

SAFE TODAY STRONGER TOMORROW

Trinity Global Services

Safety Partnerships

Trinity Global Services specializes in Safety Communications working with Aditya Birla Group, JSW Group, L and T for the last 10 years. We have a company in UAE: Job Cornelius Ventures Fz-LLC focusing on Safety, Cyber Security, Project Management and Film Making.

Trinity Global Services is also an Omni-channel integrated public relations, digital communications advisory consultancy firm, Corporate and Ad Film Making offering effective, eloquent, pertinent, viable and congenial trans-media services and solutions to our clients.

Trinity Global Services has a specialized vertical in Advanced Cyber Security.

Please find below links to our websites:

What We Do in Safety

1. Safety Pictorial Visual Standards as per International and National Safety norms across Industry sectors.
2. Third Party Safety Audits
3. Safety Films
4. Safety Communications: Posters/Emailers/Campaigns/VR Modules
5. Safety Events and Conferences
6. Safety Toll free (Safety Call centre)
7. Liaising with Government Departments
8. End to End Safety Partnerships

We ensure that our client' s objective of
“Zero Harm” gains momentum. We partner with our
client to drive unique safety interventions under seven
major elements of the client' s existing Safety Management
System.

CAPABILITY BUILDING

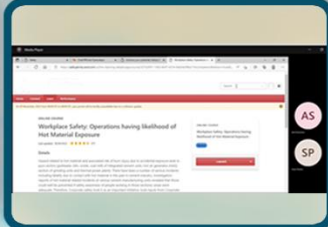

Induction & Job specific training to contractual workforce

Standard Champions Training

Contractor supervisor competency development program

E-learning courses

Capability building is the foundation of any management system.

We partner with our clients to enhance the capability of their employees and contractor workforce and helping them drive many unique initiatives.

CONTRACTOR SAFETY

Virtual training to contract workforce

Incident learning Videos

Videos to address 'At Risk behaviours'

Contractor Connect Initiative (CCI)

Pictorial SOPs

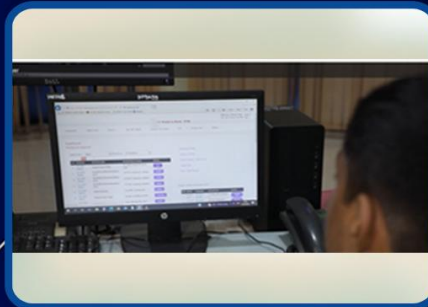

IMPEDIMENT/ BARRIER AGAINST TOWARD INCIDENTS

Job Specific Toolbox Talk

60 Sec to Think

Online Permit to Work

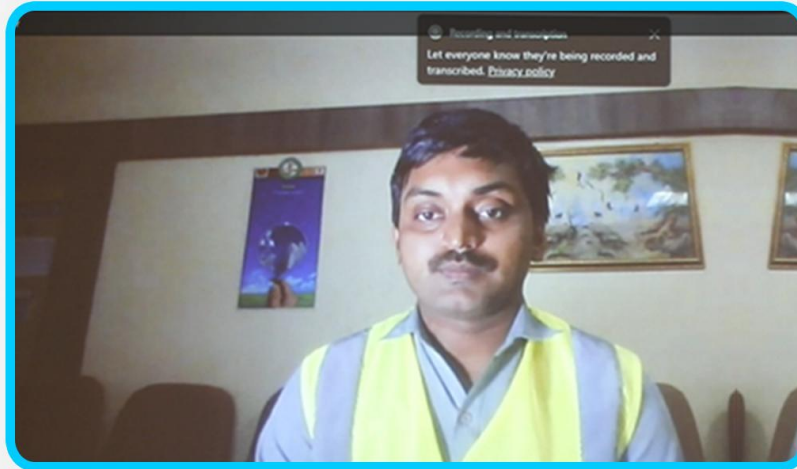

Safety toll free No. (available 24 X 7)

Digitalization: VR Modules

LEADERS' CONNECT

PRATIBIMB / प्रतिबिम्ब

PRATIBIMB

Assurance: Third Party Safety Audit

MONTHLY CAMPAIGN

MATERIAL HANDLING

Understanding Safety Equipment

Safe Load Indicator		Give Actual loading to operator	Hook latch		Prevents bouncing of sling from hook
Anemometer – Mounted on Boom top		Gives wind speed to operator	Walky talky		Effective method for communication between operator and Rigger
Load Radius Indicator		Shows total weight of load, load radius, and safe lifting capacity	Level Indicator		
Anti two blocking device		Warning systems are used to warn or prevent the crane	Rear and side over run		

We work for JSW group on the following 15 Safety Standards for the Pictorial Visual Guidance

Sr. No	Safety Standards
1	Confined Spaces
2	Working at Height
3	Scaffolding
4	Machine Guarding
5	Energy Isolation
6	Crane Safety
7	Confined Spaces
8	Electrical Safety
9	Process Safety Management
10	Permit to Work
11	Management Of Change
12	Contractor Safety Management
13	Safety Management System
14	Personal Protective Equipment
15	Conveyor Safety

Safety Pictorial Visual Standards as per International and National Safety Norms across Industry sectors.

ROAD SAFETY

JSW/GHS/GS-04

Visual Standard Guidance

 Speed Limit	 Reversing Prohibition
 Right Driver for Vehicle	 No - Vehicle Zone

LINE OF FIRE

ARE YOU IN THE LINE OF FIRE?

STEER CLEAR FROM LINE OF FIRE (LOF) INCIDENTS

Best is to eliminate the related hazards for each category of LOF incidents. When elimination is not possible, establish engineering controls e.g. physical barriers, machine guarding etc. And always have administrative controls of defence: PTW, LOTO, SOP/SWP & wearing appropriate PPEs

CRUCIAL STEPS

-  **BE AWARE** of all the hazards around you including LOF
-  **UNDERSTAND** the machines and operations in your work area where hazardous stored energy is present
-  **TAKE TIME TO THINK** about the consequences that could result from your actions

HAZARD CATEGORIES

-  **STRUCK-BY** including dropped objects
-  **CAUGHT - IN/BETWEEN** objects
-  **RELEASED ENERGY**

MANAGERS MUST

-  **ASSESS WORK SITUATIONS** where a LOF may be present, and implement controls to minimise the risk
-  **SEEK ENGINEERING SUPPORT** for situations that cannot be effectively mitigated (i.e. equipment design and human factor)
-  **CONSIDER BOTH LOF AND HUMAN FACTORS** in design reviews, HAZOP etc.

सुरक्षा, दिल से...
Suraksha, dil se...

ELECTRICAL SAFETY

DURING THE RAINY SEASON

SAFETY TIPS

-  **Avoid contact with wet electrical equipment**
-  **Use weatherproof equipment**
-  **Shut down in emergency**
-  **Check for water leakage near wiring**
-  **Avoid overloading circuits**
-  **Educate & train workers**

RISKS OF WET CONDITIONS

- 
Increased chance of electric shock
- 
Water damage to wiring and equipment
- 
Short circuits and power surges
- 
Exposure to downed power lines

BE SAFE. STAY ALERT.

**AWARENESS TODAY,
SAFETY EVERYDAY.**

Ensuring Safe, Reliable & Sustainable Operations

A circular diagram with a central orange circle labeled "Successful PSM Program". Surrounding it are eight segments, each with an icon and text: Process Hazard Analysis (gear with exclamation mark), Operating Procedures (document with gear), Training & Competency (people with gear), Management of Change (gears), Management of Change (gears with arrows), Employee Participation (people with gear), Emergency Planning & Response (bell with gear), and Contractor Safety (hard hat with shield).

QUALITY OF INCIDENT REPORTING

सुरक्षा, दिल से...
Suraksha, dil se...

A circular diagram with a central white circle labeled "WHAT SHOULD BE INCLUDED IN AN INCIDENT REPORT?". Surrounding it are six green pentagons, each with an icon and text: WHAT (question marks) - Details of the injury sustained + equipment involved; WHO (three people) - Name, position, and contact information of the employee(s) involved; WHEN (clock) - Specific time of the incident; WHERE (location pin) - Place where the accident took place; HOW (magnifying glass) - The actions an employee took that lead to the accident; and an unlabeled pentagon with a magnifying glass icon.

The advertisement features a yellow background with a faint silhouette of a construction site. Two cartoon characters, a man and a woman, are shown wearing hard hats, safety vests, and face masks, talking on mobile phones. The man is on the left, wearing a grey hard hat and a green safety vest. The woman is on the right, wearing a yellow hard hat and an orange safety vest. The text is centered and uses a bold, sans-serif font.

We handle Safety toll free call centre work for Ultra Tech Cement Limited

Liaising with Government Departments

We do Liaising with Government departments to shoot Road Safety films

End to End Safety Partnerships
